

RE: MB Docket No. 15-149

Tom Wheeler  
Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Wheeler,

The AIDS Service Foundation of Kansas City is pleased to support the merger of Charter Communications, Time Warner Cable and Bright House Networks into New Charter. Our organization plans/executes the annual AIDS Walk Kansas City event, which raises money and awareness for local organizations that provide shelter, medical care and emergency services for the 4,700 area residents battling HIV and AIDS. We have benefited from Time Warner Cable's generous commitment to our cause and we are eager to begin working with New Charter.

Time Warner Cable has been a major sponsor for our last two walks, donating cash contributions, public service announcement air time and walk-day volunteers. The company's commitment to our cause has certainly helped us achieve our goals, and we are very appreciative of the support. We believe New Charter would work to further the legacy set by Time Warner Cable - it would be a community-oriented company focused on maintaining and building upon local relationships.

In addition, New Charter would prioritize diversity and inclusion throughout its hiring, purchasing, programming and community investment. The proposal outlines numerous commitments towards these goals, and ensures New Charter would deliver quality support to nonprofits like us.

We ask that you consider the impact of New Charter and approve the merger.

Sincerely,

Michael Lintecum  
Event Director, AIDS Service Foundation of Kansas City
